Yellowstone County

A slowdown in the natural resource industries is likely to have a “double whammy” on the Yellowstone County economy. First of all, Billings is the dominant trade and service center in the region. Layoffs or closings in Richland or Stillwater counties will be quickly felt by local suppliers and other firms serving the rural areas. Secondly, even though there are few mines or drilling rigs in Yellowstone County, many energy and natural resource-related headquarters and management personal live in and near Billings. The forecasts do not incorporate actual shutdowns and closings, but should they occur, the projections may be too optimistic. Retail and service establishments in Miles City and Bozeman continue to provide stiff competition. Although house prices remain relatively strong (Page 7, Table 1), the negative growth in 2008 (and also 2009) reflects significant declines in construction and real estate employment and earnings.
