Yellowstone County

The energy/natural resources freefall that appeared imminent last year luckily failed to materialize. Even so, the Billings economy did not escape recession impacts. Real estate and construction began to nosedive in mid-2008, and the downward slide accelerated in 2009. During early 2009, declines also appeared in retail trade, wholesale trade (including farm implements), finance, transportation, warehousing, and certain sectors of manufacturing. So far, employment and earnings in the vital oil refining sector remains stable or even slightly increasing. The slow rates of growth forecast for 2010 and later reflect continued weak conditions in construction and real estate plus increased competition from retail and service establishments in second-order trade centers such as Bozeman and Miles City.
